

FAST, ERGONOMIC AND SAFE PROCESSING OF YOUR INCOMING MAIL

EXCLUSIVE SLICING MECHANISM

EXCELLENT ACCESSIBILITY OF THE MACHINE

OPTIONAL EMPTINESS DETECTION FOR EXTRA SECURITY

OPTIONAL CONVEYOR BELTS FOR EXTRA PERFORMANCE

SAVE TIME AND MONEY

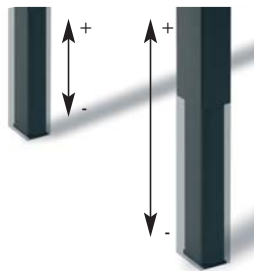

COMFORTABLE AND SECURE EXTRACTING

The wide opening of the envelope leaves your valuable and important contents fully accessible for reliable and convenient removal. The IM-75 is even equipped with a light that enables more comfortable but also more reliable extraction of the contents from the envelope.

HEIGHT ADJUSTMENT

Working height of the IM-75 can be adjusted fully automatic between 720 and 915 mm.

OPTIMAL ERGONOMICS

The IM-75 has been designed with ergonomics in mind. To mention but a few innovations: the vacuum technique for a low noise level and great adjustability, the logical work flow (from left to right) and the sublime accessibility.

BUILT TO LAST

The robustness and reliability of the IM-75 guarantees the highest level of performance and uptime. This increases your productivity and the ability to deliver the incoming mail as soon as possible for further processing within your organisation!

CUSTOMER AND AFTER SALES SERVICE

Neopost ensures the best customer and after sales service in the world. We wouldn't be nr. 1 in the world if we didn't care about you, would we?

WHY CHOOSE NEOPOST

Neopost is the European leader and leading worldwide supplier of mailroom equipment and logistics solutions. Neopost offers you the most advanced range of products and services for on-line or off-line postage, large volume mail insertions, address printing, incoming mail and occasional parcel delivery and traceability management.

IM-75

YOUR PROFESSIONAL INCOMING MAIL PROCESSING SOLUTION

The IM-75 sets the standard in productivity, ergonomics and flexibility

WE VALUE YOUR MAIL

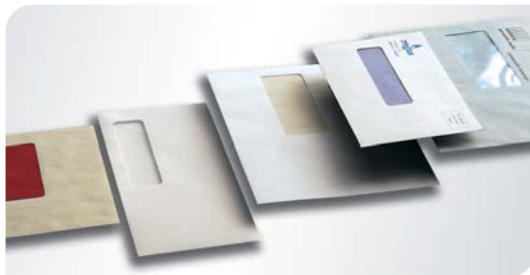

neopost

IM-75

YOUR PROFESSIONAL INCOMING MAIL PROCESSING SOLUTION

Processing incoming mail is complex and time-consuming. You have to ensure that all of the following tasks are carried out: opening envelopes, removing the contents, checking to make sure that nothing has been overlooked, dating and stapling, identifying, sorting and preparing for distribution.

Automation of this process with the Neopost IM-75 results in a substantial saving of time and reduces the likelihood of errors. It also takes the strain out of peak workloads, increases staff motivation and performance in mail departments. The IM-75 is a unique professional incoming-mail processing solution for companies that take their incoming mail seriously!

STANDARD AND MIXED MAIL

Does your incoming mail vary in envelope size or is it homogeneous? Do you process mixed mail where every envelope requires specific attention, or do you process more uniform remittance or business reply-mail? The IM-75 can handle both with a speed up to 4.500/hour, thanks to its vacuum based technique, the fully adjustable envelope hopper and the patented slicing mechanism. Simply load your envelopes in the envelope hopper and the machine automatically feeds and opens them!

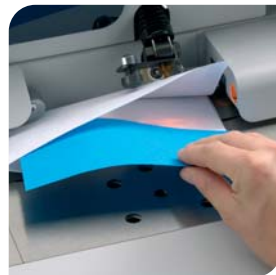

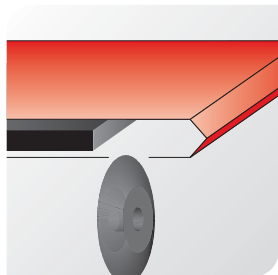

INPUT OPTIMISATION

The envelope hopper can hold up to 800 envelopes. Other standard productivity features are a position to lay out envelopes waiting for processing and extractable supports to place your post box on.

Professional mailroom furniture

Conveyor belts for extra performance

SEVERAL OPERATING MODES

The IM-75 has several operating modes. The machine can be operated either in an automatic mode or in operator mode. In automatic mode, envelopes are presented in an adjustable sequence. The operator mode is a perfect blend between operator convenience and productivity: each envelope is presented after the operator has triggered a sensor.

ACCESSIBLE AND SAFE

The IM-75 gives you quick, safe and easy access to all parts of the envelope path of the machine.

ULTIMATE SECURITY AND PROTECTION

Investing in professional incoming-mail processing solutions means that you demand the highest level of security. Besides the ergonomic light and the wide opening of the envelope, the IM-75 can be delivered with an automatic contents detector (optional) to ensure that all of your important and valuable documents are properly processed. An exclusive and patented slicing mechanism slices the envelope open without cutting anything off. This protects you from losing information from valuable documents and it eliminates the production of dust and scrap paper. It also guards against sharp paper edges.

EXPAND YOUR POSSIBILITIES

Extend the IM-75 with conveyor belts and professional mailroom furniture and create the ultimate multi-operator mail opening and sorting solution for now and the future. At any time, Neopost can provide you with additional capacity so that one IM-75 can accommodate more operators.

EASY TO OPERATE

The clear and simple control panel is self-explanatory and applications can be changed at the touch of a button. The user can concentrate on the core task, sorting and judging the incoming mail and distributing it as fast as possible.

CONVENIENCE AND EFFICIENCY

To achieve the ideal and most efficient working environment, the IM-75 can be equipped with several different ergonomically shaped tabletops. It doesn't matter whether you process mixed mail or standardised reply mail or need hardly any or plenty of room to sort your mail. The IM-75 can be configured to meet your requirements.

MEET YOUR SORTING REQUIREMENTS

The IM-75 offers a unique sorting concept: depending on your situation, the IM-75 can be equipped with several sorting trays. Our solution is very flexible and can grow with your business.
